

Speaker Bio:

Prashant Chintapalli is a PhD candidate in Decisions, Operations & Technology Management department at the Anderson School of Management, University of California, Los Angeles. His current research interest lies in social responsibility issues in supply chains, and in operations management in general, with an objective to design policies and make decisions that can result in Pareto improvement of the supply chain partners. Apart from social responsibility issues, he is also interested in a wider domain of research problems that concern capacity (or inventory) and pricing management in supply chains. His papers have been published (or forthcoming) in *Manufacturing and Service Operations Management*, *Production and Operations Management*, *Naval Research Logistics*, *Annals of Operations Research* and the *Journal of the Operational Research Society*. He also serves as an ad-hoc reviewer for a few journals in the area of operations management.
