

Speaker Bio:

Yingdong Lu is a Research Staff Member in Mathematics Science, IBM Research, AI Science. Dr. Lu conducts research in the field of probability theory and probabilistic models. He focused on developing mathematical models and theory for the analysis and control of large-scale stochastic systems. He has published more than 70 articles, and been awarded the INFORMS Daniel H Wagner Prize, and two IBM Outstanding-Technical-Achievement Awards. He received a Ph.D. in Operations Research from Columbia University.
